

Nicholas Guillet

Atlanta, GA | 770-363-3522 | nguillet@villanova.edu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Education

Villanova University

August 2023 – May 2027

B.S. in Computer Engineering | Tech GPA: 3.898

Villanova, PA

Minors: Math, Computer Science, Business | **Dean's List:** All Semesters

Experience

Data Science Intern

June 2026 – July 2026

ConstructConnect

- Engineered a synthetic data pipeline with feature extraction and statical optimization to help improve a Named Entity Recognition model's performance in recall and precision for construction specification documents by over 20%
- Through parallelization, optimized SFTP process by over 400% in speed, and furthered the validation accuracy

Math Tutor

June 2025 – Present

Villanova Math Center

- Instructed 20+ students in Accounting, Finance, Calculus, and Linear Algebra using data-driven problem solving

Technical Intern

July 2025 – August 2025

HomeOwners Advantages (HOA)

- Deployed a flask server to help business team utilize python data Extract, Transform, and Load pipeline, saving 1000s of hours of manual data merging
- Demonstrated python to the lead business team, allowing them to easily migrate to new data transform process

Projects

Sports Analytics & Machine Learning Models | Baseball | Frisbee

August 2020 – Present

- Built predictive models using linear regression and feature selection across 3,000+ MLB seasons and 500+ players supporting data-driven investment analysis for \$100M+ decisions
- Gained understanding on approaches that should be used in the stages of the analysis and model creation process

Extended Reality Lacrosse Goalie Training | Senior Capstone

January 2026 – December 2026

- Designed a realistic XR training environment and reaction-time simulation for lacrosse goalkeepers, integrating 5+ real-time components to replicate real-life speed
- Integrated live sensor data with software, translating a prototype system into a deployable real-time product

Leadership

Villanova Club Ultimate Frisbee

August 2023 – Present

Senior-Year Team Captain

- Senior team captain directing 20+ athletes; developed training methodology, execution strategy, and competitive performance planning

NovaRacing FSAE Club

December 2023 – December 2025

Data Acquisition Member

- Optimized and calibrated telemetry and vehicle sensors for data acquisition platform across 10+ subsystems; ensured signal accuracy and integration

Technical Skills

Programming: Python, C++, SQL, JavaScript, C, VHDL, Git, Jupyter

ML & Data Science: Machine Learning, NLP, Classification, Regression, Feature Engineering, Statistical Modeling, Scikit-learn, Pandas, NumPy

Data Engineering: ETL, Data Pipelines + Transformation, Model Optimization, Airflow, Tableau, Vertex AI, Looker

Hardware: Arduino, FPGA (Quartus), Embedded Systems, Digital Logic, Sensor Calibration
